

POSE TASK LIGHT LED

POSE is a series of high output lamps based on conical forms that playfully explore the world of optical physics, through the world of flat lenses often seen in lighthouses, traffic lights and in scientific instruments. With anthropomorphic charm, POSE manipulates light into focused, magnified beams with striking effect. A strong silhouette and touch of humour define its personality, while precise adjustability and high light output ensures adaptability and functionality for any space, domestic or contract. Balancing functionality with minimal design, POSE radiates light and individuality with equal brilliance.
