

Perpetua _Table lamp

Perpetua is a collection of **cordless table lamps** designed to last over time. Its distinctive feature is a **replaceable power system**, which goes beyond the logic of integrated batteries and allows continuous use of the lamp, even in professional settings.

The model

This Perpetua model is the tallest among the single-arm versions of the collection. The increased verticality enhances the lamp's presence on the table and allows the light to rise more clearly from the surface, making it suitable for large tables and settings where lighting plays a more central role.

Power system

The lamp is composed of a die-cast aluminum structure integrating the **LED module** and a **removable battery pack**, cylindrical in shape and inspired by a candle, which magnetically attaches to the structure. When needed, the battery can be replaced with a fully charged one, ensuring uninterrupted use. Charging takes place via a **contact charging base**; a **multi charging base** is also available as an accessory, ideal for simultaneously charging multiple battery packs in a compact space.

Light control

The battery pack integrates a **touch control**, positioned at the "wick", allowing on/off switching, dimming and selection of four light color temperatures, adapting the lighting to different needs and moments of use.

Materials, finishes and use

Made with a die-cast aluminum body and polycarbonate diffuser, Perpetua is available in **black, red** and **metallic-leaf gold** finishes. Thanks to its **IP rating IP54**, the lamp can also be used outdoors; versions with metallic-leaf gold finish are not recommended for prolonged outdoor use.

In summary

The tallest version of Perpetua is designed for those looking for a **cordless lamp with a more prominent visual presence**, ideal for large tables and for contract settings where light becomes an integral part of the overall arrangement.
